

High Impact Technology Exchange Conference

Educating America's Technical Workforce

Fairmont Scottsdale (Arizona)

July 19–22, 2009

Title: Session A3: Information Security / Information Assurance

Date/Time: Tuesday, July 21, 3:30 PM – 5:00 PM

Location: Fairmont Scottsdale Resort, Salon A

Description: Information Security / Information Assurance (IS/IA) planning is needed at the time that a systems development project is getting off the ground, which includes information systems, energy systems, manufacturing systems, etc. Security cannot be an afterthought, or organizations leave themselves vulnerable to compromise, espionage, theft, and vandalism.

A sample application of these principles will be highlighted concerning security requirements for Voice over Internet Protocol (VoIP) implementations. This session will include live examples of lessons learned from doing security certifications and audits. Session participants will be asked to outline the elements of a security package for their own system development project.

Presenters:

Margaret Leary, Northern Virginia Community College
Bob Spear, CyberWATCH Center
