

**High Impact Technology Exchange Conference**

***Educating America's Technical Workforce***

**Fairmont Scottsdale (Arizona)**

**July 19–22, 2009**

**Title:** The Future of Mobile Teaching, Learning and Work

**Date/Time:** Sunday, July 19, 1:00 PM – 5:00 PM and Monday, July 20, 8:30 AM – 12:00 PM

**Location:** Fairmont Scottsdale Resort

**Description:** This workshop will discuss how the Apple iPhone and the Amazon Kindle, along with the iPhone software development kit (SDK) will forever transform technician work, teaching and learning. The Apple iPhone and the Amazon Kindle have dramatically changed the way we view the mobile web and e-books. The iPhone provides a web browsing experience that approaches the desktop computer. Likewise, the Amazon Kindle has created a platform for e-books that is simple, intuitive and satisfying to the user. The workshop will detail what is different about these devices and how they are significant. Presenters will lead a hands-on discussion of how these devices will transform mobile learning and how the Apple iPhone SDK will permit the rapid creation of mobile teaching and learning applications. Technicians will develop a better understanding of new and emerging mobile information and communications technology devices and how they are used in the modern workplace.

**Presenters:**

Gordon Snyder, ICT Center  
Mike Quassaunee, Brookdale Community College
